Supplies:

- 2 - 1x4x8 pine boards
- 1 - ¼” plywood handy panel
- 2 - Simpson Strong-Tie 66T strap
- 4 - ¾” hex lag screws
- 1 - ¾” x 72” flat steel bar
- 4 - 5/16” x ¾” steel spacers
- 3 - 3” wall screws & mollies
- 2 - 3” pulley wheels with axel bolts
- 1 ¼” pocket hole screws
- ¾” & 1” finish nails
Cut List:

- 2 – 1x4 @ 27 ½” (long sides)
- 2 – 1x4 @ 17 ½” (short sides)
- 1 – 1x4 @ 26 ¾” both ends mitered 45 degrees parallel, cut to fit (first diagonal)
- 2 – 1x4 @ 13 3/8” one end mitered 45 degrees, cut to fit (second diagonal)
- 1 – ¼” @ 27 ½” x 22 ½” (backing)

**Step 1:** Make frame. Attach the short sides to the long sides using wood glue and 1 ¼” pocket hole screws.
Step 2: Attach the backing to the frame using wood glue and ¾” finish nails.
**BARN DOOR WINDOW COVERINGS**

**STEP 3**

*Step 3: Cut the first diagonal to fit and attach to backing using wood glue and 1” finish nails.*
**BARN DOOR WINDOW COVERINGS**

**STEP 4**

**Step 4:** Cut the second diagonal pieces to fit and attach using wood glue and 1” finish nails.

Finish as desired.
